A Training only
Privileged teacher
State + task / holding objective
Student adaptation
History + measured pose + goal
Local actor fitting
Teacher actions + regularization
supervised action labels
B Deployment: semantic decisions
Current RGB
Instruction + public history
Visual agent
One request may be pending
Validate public action
Inspect / bind / reorient
Shared goal bank
Update active goal
active goal
C Continuous motor control
request status / elapsed time
Measurements
Pose + proprioception
Motor student
History + active goal
Local actor
Waiting or execution
Apply joint targets
Hand--object dynamics
new measurements; updated RGB for the next request
